KHOR JIA YONG

Looking forward to challenging organisation which will provide me with essential experience and knowledge and I will be able to learn something extraordinary as well as enhance the technical skills and soft skills.

Skills

- **C & Python Programming**
- **Machine Learning and AI**
- **MATLAB & Arduino**
- **PLC Programming**
- **Verilog for FPGA Development**
- **Raspberry Pi**
- **3D Printing**
- **PCB design**
- **Circuit design**
- **Embedded systems**
- **Microcontroller programming**
- **Electrical troubleshooting**
- **Data analysis**
- **IoT (Internet of Things) Development**
- **Wireless Communication**
- **Sensor Integration**
- **Telecommunication Systems**
- **Project management**
- **Adaptability and Flexibility**
- **Adobe Software**

Work Experience

Internship as Education Technology Department | Cytron Technologies Sdn. Bhd.
October 2023 - January 2024

- Responsible for managing educational programs, developing educational content and materials (including a tutorial website for Cytron), and leading various digital making projects involving technologies such as Arduino, Raspberry Pi, micro:bit, and 3D printing. Also contributed to the organization and execution of outreach programs to promote STEM education and hands-on learning experiences.

Chemical Health Risk Analyst | ALPHA OSH Solutions
July 2022 - March 2025

- Tasked with reporting chemical and health hazards in compliance with OSHA standards, including identifying potential chemical risks across various workplace environments. Conducted multiple assessments based on the 2017 Recommended Practices for Chemical Health Risk Assessment. Collaborated with companies such as B. Braun, Jooi Brothers, Mi Equipment, among others.

Internship as Quality Assurance Department | NationGate System Sdn. Bhd.
July 2025 - September 2025

- Interned at NationGate Sdn. Bhd., gaining hands-on experience in electronics manufacturing across industries such as IoT, automotive, and medical. Assisted in quality inspections, supervised daily production tasks, and troubleshot technical issues to improve efficiency. For example, primary responsibilities included performing quality inspections of the latest production technologies and supervising operators in daily tasks. Two major projects were completed: the first involved final-stage quality inspection of the Hy-Tek GXO-HM robotic systems (A42T-E2 project) to ensure standards were met, and the second focused on troubleshooting and resolving technical issues in production, enhancing practical engineering and problem-solving skills.

Hobbies

Fitness and Gym Training:

- I am passionate about maintaining a healthy and active lifestyle through regular gym workouts. Strength training and fitness routines not only help me stay physically fit, but also instill discipline, determination, and a strong mindset.

Swimming:

- Swimming is a hobby that allows me to improve my endurance, focus, and overall well-being. I enjoy both recreational and fitness swimming, as it promotes relaxation and sharpens my physical coordination and stamina.

Exploring Sweets and Desserts:

- I have a genuine interest in exploring different types of sweets and desserts, with a special love for cakes. Trying new flavors, cuisines, and local specialties is a fun and enriching experience that allows me to appreciate cultural diversity and the creativity behind food.

Education Qualification

Bachelor's Degree in Electronic Engineering | Universiti Teknikal Malaysia Melaka (UTeM)

March 2024 - March 2027

CGPA:3.97

Core Technical Knowledge:

- Electrical and Analog Electronics Systems
- Digital Systems and Microprocessor Technology
- Electromagnetic Fields and Waves
- Engineering Materials
- Circuit Theory
- Engineering Statistics
- Artificial Intelligence
- Control Systems and Principles

Additional Skills:

- Website Design (Cytron's tutorial website)
- Troubleshooting with Raspberry Pi
- Machine Learning on Edge Impulse
- PCB Soldering and Fabrication
- C and Python Programming
- AutoCAD Drawing
- Japanese Language (basic)
- 3D Printing

Achievements:

- Participated in Innovation and Technology Competition (INOTEK) 2026
- Awarded Dean's List (from Year 2 - Year 4)
- IDP Project (AI-Implemented IoT-Enabled Smart Medicine Dispenser)
- Media Committee Member | UTeM Buddies International Society

Diploma in Electronic Engineering | Universiti Teknikal Malaysia Melaka (UTeM)

July 2021 - March 2024

CGPA:3.97

Core Technical Knowledge:

- Basic Electrical and Electronics Engineering
- PCB Design and Fabrication
- Microcontroller Programming and Applications
- Logic Circuit Design
- Industrial Automation
- Instrumentation and Electronic Measurement
- Telecommunication Engineering
- Engineering Mathematics and Algebra

Links

- Diploma Project - IoT based "My Smart Savings Box"
- Cytron Tutorial Contributions
- Microcontroller Assignment Project
- IDP Project - AI-Implemented IoT-Enabled Smart Medicine Dispenser
- Publication of Diploma Project

Additional Skills:

- PCB Soldering and Fabrication
- Circuit Design and Layout (using AutoCAD, Multisim)
- Logical Troubleshooting and Problem-Solving
- Microcontroller System Development
- Basic Fiber Optic Handling
- Leadership and Team Collaboration
- C programming
- Machine Learning

Achievements:

- Participated in Innovation and Technology Competition (INOTEK) 2023
- Awarded Dean's list (from Year 1 to 2)
- Diploma project (My Smart Savings Box)
- Publication of diploma project on UTeM Open Journal (JET)

Sijil Pelajaran Malaysia (SPM 2020) |
SMK Berapit

- Scored 8 A's (4 A+, 3 A, 1 A-) and 2 B's
